

EXPERIENCE

- **DX FutureTech** Bengaluru, Karnataka
React Native Developer June 2024 - Present
 - Developed a B2C app for UK property management, optimizing processes for buying, renting, and selling.
 - Created a B2B property management solution for UAE, digitizing real estate operations.
 - Architected modular, high-performance applications with reusable components and future-proof, scalable architecture.
 - Implemented login functionality with biometric authentication and guest login for enhanced user access and convenience.
 - Added offline compatibility using WatermelonDB, ensuring uninterrupted app functionality in low-connectivity environments.
 - Built fuzzy search and sort capabilities, enabling users to filter and discover properties efficiently.
 - Integrated Google Maps and Directions API to provide real-time navigation and geolocation support for property listings.
 - Enabled in-app PDF export for generating and sharing professional reports.
 - Integrated GraphQL APIs and payment gateways, enabling seamless user experiences on iOS and Android.
 - Embedded YouTube video integration for dynamic content delivery within listings and informational sections.
 - Led the development of advanced features like animations, notifications, and in-app purchases.
 - Enhanced app security with secure credentials and role-based access control.
 - Integrated native modules to enhance performance and enable advanced platform-specific functionality.
 - Streamlined CI/CD pipelines using GitHub Actions for automated testing and deployment.
 - Contributed to mobile performance optimization efforts by profiling, debugging, and reducing render lag and memory consumption.
- **LTIMindtree** Hyderabad, Telangana
Senior Software Engineer - React Native Oct 2020 - June 2024
 - Led cross-platform app development, integrating chatbots, payment systems, and inventory features.
 - Designed app architecture with Redux Saga/Thunk and enabled offline database support using WatermelonDB.
 - Integrated RESTful and GraphQL APIs, ensuring robust backend communication.
 - Streamlined CI/CD with CircleCI and GitHub Actions, optimizing DevOps processes.
 - Enhanced performance with React Native Skia and Reanimated for rich graphics.
 - Collaborated closely with cross-functional teams and mentored junior developers during sprint planning and code reviews.
- **Freelance Mobile Application Developer** Hyderabad, Telangana
Mobile Application Developer June 2019 - Aug 2020
 - **Feazy (Protron Technologies):** Built a contactless dining app with QR code scanning and integrated payments.
 - **Technology Stack:** React-Native, Firebase (PostGIS), QRcode-Scanner
 - **Ridesharing App (AONE Apps):** Developed a cross-platform ridesharing app with real-time mapping and location tracking.
 - **Technology Stack:** React Native, Firebase, MapBox, Google Maps
 - Deployed mobile applications to both the Google Play Store and Apple App Store, ensuring production readiness and post-release support.

PROGRAMMING SKILLS

- **Technologies** React-Native, Android, React-js, Node.js, Redux, GIT, Firebase, RPA, Power Platform, Whiteboarding.
- **Languages:** JavaScript (4 Years), HTML, CSS, Python, SQL, Bash, Flex, ES6

PROJECTS

- **Pratibha** : Developed an app connecting underprivileged students with mentors.
- **Adverse Road Condition Map**: Map-based app for road hazard alerts, recognized as Smart India Hackathon 2019 Winner.

ACHIEVEMENTS

- **1st position**: Smart India Hackathon 2019 Winner for complex problem statement.
- **Spotlight award 2022**: Received the Spotlight Award for consistently and punctually delivering critical use cases.

EDUCATION

- **Chaitanya Bharathi Institute Of Technology** Hyderabad, TS
Bachelor of Technology in Information Technology; *2016 - 2020*
- **Navy Children School** Port Blair, A&N
Intermediate; *2013 - 2015*
